ifarmasi pharmacy ecosystem is a comprehensive unique **pharmacy-centric** web-based solution designed to meet the new normal healthcare expectations of the health consumer incorporating the latest secure A.I, and Internet of Things technologies.

Pharmacy health customer patients and prescribing doctors may on-premise and/or online communicate purchases and refill prescriptions using available computing devices with payment gateway options. Connected telemedicine kiosks facilitate teleconsult services from pharmacy to affiliate care provider doctors, clinics and hospitals impacting revenue, patient engagement and experience.
